HRS-03

Bucket Elevator Systems

CAPACITY

20 t/s – 1000 t/s (tesis ihtiyacına göre pro

DIMENSIONS

Kayış kayma sensörü, devir sensörü, zincir/kayı

PRODUCT DESCRIPTION

High-Capacity Vertical Conveying

Agrofine bucket elevator systems are designed for the safe, efficient and high-capacity vertical conveyance of grain and granular products. The systems are engineered to meet varying capacity and height requirements in silo facilities, grain storage centres, feed mills and industrial processes.

Capacity and Performance

Agrofine bucket elevators can be designed with a capacity range of 20 tonnes per hour to 1,000 tonnes per hour, depending on the facility's requirements. Thanks to their optimised design, they ensure:

- high-efficiency product flow
- minimal product breakage
- low energy consumption
