

MILK PROCESSING MACHINERY AND EQUIPMENT

Milkman-01

Milkman Milk Processing Machinery

PRODUCTION LINE

PRODUCT DESCRIPTION

MILKMAN manufactures all the equipment required for milk processing plants, from milk reception to pasteurisation, and from product processing to filling and packaging. In addition to individual machines, it constructs turnkey dairy plants; it manages all stages – from process design and equipment manufacture to installation and commissioning – under one roof. Alvetra Global Solutions offers MILKMAN plants as turnkey projects to international investors and food producers.
